

ALL HCG PRODUCTS ARE NOT THE SAME

Over the past year, the market has been diluted with hCG products. Practitioners and patients alike have been looking for ways to distinguish the different homeopathic hCG formulas.

In order to evaluate the hCG in any hCG product, there are four key questions to pose to ensure that it is an hCG you want to be putting into your body:

IS THE HCG MADE AS A REAL HOMEOPATHIC, HAND SUCCUSED, BY AN FDA-APPROVED MANUFACTURER THAT HAS SUBSTANTIAL EXPERTISE IN MAKING HOMEOPATHICS?

DesBio's hCG product is a real homeopathic, hand-succused (a process to ensure a homeopathic actually works), in an FDA registered facility that is regularly inspected by the FDA.

If you cannot verify that your product is hand succused, from an FDA approved manufacturer that specializes in homeopathics (creating mother tinctures that "work" is a unique skill that many new homeopathic manufacturers have not mastered), and is regularly inspected by the FDA we would not recommend you take the product. If any of these specifics are not met, it is likely the homeopathic will not be effective.

WHAT IS THE SOURCE MATERIAL FOR THE HCG?

Many hCG formulas use raw hCG that is sourced from foreign countries and/or are made from animal-based hCG.

DesBio's hCG is actually from pregnant human female urine sourced in the USA. It is the most expensive hCG and can only be sourced in small quantities.

If your hCG provider cannot verify the source of their hCG, we would not suggest using the product.

DOES THE HCG PRODUCT HAVE AN NDC NUMBER?

An NDC is a National Drug Code (NDC) number that is given when the product is registered with the FDA. DesBio's hCG Professional Formula has been registered with the FDA and has an NDC number.

IS THE HCG IN A FORMULA THAT OPTIMIZES ITS STRENGTH AND EFFICACY?

DesBio homeopathics are designed and formulated using comprehensive ingredient principles and are made using burgi groups and desbiochords, the latest formulation advancements in homeopathy. This formulation process creates stronger and more potent homeopathics. A single ingredient homeopathic (like a straight hCG) cannot be made as effective and strong as a multiple ingredient homeopathic. Dr. Bruce Shelton, MD, MD(H) one of the foremost US homeopathic experts carefully formulated our comprehensive hCG formula with 15 other ingredients to optimize and strengthen the overall performance. If your product only has hCG, or hCG plus two or three ingredients, it will not be as effective as the DesBio hCG Professional Formula.
